Press Release No. 08/2021

xSuite publishes new version for accepting e-invoices worldwide

„xSuite Interface E-Invoice Prism" introduces a new range of functions for internationally active companies that receive electronic invoices in various formats.

Ahrensburg/Germany, April 20 08, 2021

Electronic invoices are on the rise internationally. In response, the xSuite Group has expanded its portfolio of solutions and developed a component that can process invoices with all common formats and standards worldwide — XRechnung, ZUGFeRD, PEPPOL BIS Billing 3.0, Factur-X and InvoiceNow. More will soon be accommodated.

With the technical interface xSuite Interface Prism, it was already possible to receive and process e-invoices in the formats XRechnung, ZUGFeRD and Factur-X. With the purpose of giving its international customers optimal support in accepting e-invoices, xSuite has now introduced Version 4.71 — xSuite Interface E-Invoice Prism, which comes as a standalone solution component.

xSuite

It's simple. It's digital.

The component automatically retrieves machine-readable invoices in XML format from an e-mail inbox or e-invoice portal, reads their contents, and automatically transfers relevant information to the appropriate fields in the ERP system. For convenience in downstream processing, the machine-readable document is also displayed with clear visualization. Parallel to transfer to the ERP system, the e-invoice is sent to an archive for audit-proof storage. With the xSuite workflow solutions, subsequent work steps such as checking and approval can also be mapped digitally and automatically in the ERP system.

xSuite Interface E-Invoice Prism now also processes the InvoiceNow format for Singapore and PEPPOL BIS Billing 3.0, the leading e-invoice format in the EU. For the former, the solution component received the „Peppol ready" award from the Infocomm Media Development Au-thority (IMDA) in Singapore. With the new version, XML invoices of all formats can be visual-ized as PDFs, and recursive item lines can be extracted from XRechnung invoices (nested items with sub-items). xSuite Interface E-Invoice Prism supports portals based on PEPPOL, can process PEPPOL Business Message Envelopes, and offers a high level of security through portal connection via a proxy server.

The xSuite Group at a Glance
• Established in 1994
• Software manufacturer of xSuite®
• Provides:
