

Press Release No. 28/2023

xSuite Benelux at SAPIence USERday 2023 in Belgium

With the new invoice workflow for SAP S/4HANA Cloud, Public Edition on SAP BTP, the software manufacturer xSuite supports companies with their clean core strategy and enables new areas of application for P2P automation

Maastricht/Netherlands, Edegem/Belgium – 14 November, 2023

Managing complexity in a company's SAP ecosystem becomes critical when moving to automate processes and transition to the cloud. xSuite, the specialist for accounts payable invoice automation and exhibitor and speaker at the event, will present tailor-made solutions for this topic in Edegem on 5 December 2023.

At SAPIence's yearly USERday, visitors can expect to gain a deeper understanding of how SAP can support businesses in their sustainability and resilience initiatives. They will learn about specific SAP solutions, best practices, and customer stories that have been successfully implemented using SAP technology.

Hans Willems, Managing Director of xSuite Benelux BV from Maastricht/NL, subsidiary of the German software manufacturer xSuite Group, will hold a presentation under the title "Clean Core, Smooth Sailing" (Break-out room 2, 15:00 h – 15:45 h). In this session, he'll explain how to prepare an SAP system for automation and the cloud, and how the SAP Business Technology Platform (BTP) facilitates these initiatives and explore strategies for maintaining a clean core in a company's SAP system.

Solutions on the SAP BTP are the ideal approach to meet the requirements for further automation by the business departments, while keeping the core clean. As a global leader in AP Automation, xSuite will illustrate at the USERday how its intelligent invoice solution on the BTP revolutionizes the way customers can handle their AP processes. The software manufacturer will also demonstrate how to connect invoice receipt with upstream processes in purchasing. The aim here is to link digital procurement and invoicing processes in a manner that creates an end-to-end procure-to-pay (P2P) scenario.

Event information:
